

Formal Models of Rational Belief

September 13, 14, and 16

ICT 516

Sep 13, 11 am—noon	Probability and Bayesianism
Sep 14, 4 pm—5 pm	Logic and Belief Revision
Sep 16, 4 pm—5 pm	Dealing with Inconsistency

Are you interested in how computers can have beliefs? In logic and probability? In how to model rationality and knowledge? Come and see how all these can be combined!

All are welcome: these talks should interest those in computer science, philosophy, psychology, and mathematics. Each talk is independent, self-contained, and has no prerequisites.

Samuel T. X. Khoo, University of Sydney
Computer Science Undergraduate Society, University of Calgary
